

WESTCO FILTERS

Liquid Filter Solutions since 1982

Vibro-Separator Screens

Westco Filters offers a complete line of vibro-separator screens and equipment. Our screens are manufactured to fit all industry standard equipment. We supply screens from a wide variety of materials including: TBC (tensil bolting cloth); MG (market grade wire cloth); Magnetic 304SS; Synthetics (nylon, Polypropylene) and others.

We offer a Re-screen Program which allows users to recycle their used screens – saving money and the environment. (see below)

Vibro-separators are used to separate solids from liquids or to segregate or size dry materials. Screens are available from 4 to 500 mesh (30 microns) for separating or sizing materials with as many as four different decks. Vibro-separators can be mounted in most areas and require only a small footprint to operate. Simple and easy to operate, Vibro-separators offer a low energy, cost effective way to screen the most demanding products. Screen change-out is as simple as un-clamping and clamping on a new screen.

Westco offers screens from 18" to 60" diameter depending on the flow and the requirements of your screening application. Each screen can be manufactured with a mesh rating of 4 to 500 mesh.

Westco supplies new and replacement round screens for all major brands of vibratory screeners in our dedicated manufacturing facility. Westco round screens are available in nylon, polyester, and stainless steel materials with mesh opening sizes ranging from 5 to 5000 microns. We offer FDA compliant adhesives and sealing strips to meet the stringent needs of the food industry. Our unique ring exchange program allows users the opportunity to receive credit for used rings, which we re-screen. This program reduces waste while minimizing cost along the supply chain.

Re-Screen Program – Go Green ! Westco offers a re-screen program where your used screens are recycled and shipped back to you as good as "new". Using our re-screen program saves money and the environment by re-using the ring. Spent screens are returned to us and we remove the damage or worn screen, refurbish the ring and re-screen them with new wire cloth – making the screens as good as new.

48" Vibro-Separator
New and Used Units Available

Replacement Parts – Accessories Westco Filters supplies replacement parts and accessories for most vibro-separator brands. Replacement parts include: Clamp Bands, Boots, Decks, Balls & Sliders and Motors
