Felt Filter Bags

Standard Felt Bags

Westco Filters felt filter bags are manufactured using the highest quality materials providing consistent results with every use. Silicone and FDA compliant, our polypropylene and polyester medias come standard with a fiber free surface treatment to prevent contamination downstream.

Providing some depth filtration felt bags offer high solids loading capacity and are excellent for the removal of solid particles, soft particles and gels. Standard materials of construction include: polypropylene, polyester, nylon and Nomex. Felt bags are typically available from 1 to 200 micron. * Nomex is a registered trademark of E.I DuPont.

- Micron Ratings from 1 to 200 Microns
- All Industry Standard Sizes
- Excellent Chemical Compatibility
- Low Pressure Drops
- Plastic Tops and Metal Ring Tops
- Depth Media
- Welded Seams
- High Flow Rates
- Exceptional Value
