Dust Bags and Cartridges

Westco Filters offers a complete line of replacement dust bags and cartridges to fit most OEM equipment. Dust bags are available in a variety of felt and woven materials.

Westco Filter supplies replacement dust bags for most manufacturers. We offer a wide range felt and woven medias ranging from 8-22 oz. per square yard. Standard medias can be supplied with a number of finishes and specialty coatings to improve performance with high temperature, chemical resistance and cake release. Bags can be made with grounding wires to protect against static. Westco will deliver high quality to improve your process.

Westco offers high quality OEM replacement Dust Collector Cartridges. We stock many common materials and sizes for fast and dependable service - lead time are typically from stock to 5-10 days. We offer a wide variety of materials and sizes to fit most industry standard collectors servicing industrial applications including: grinding, sanding, welding, powder coating, chemical processing and food processing to name a few.

Westco supplies replacement dust cartridges for variety of OEM dust collectors including the following:

Aerology
