Liquid Filter Solutions since 1982

## Flat Bed Filter Media

Westco offers a complete line of roll media for all types of industrial applications. Polypropylene, Polyester, Nylon, Raylon and many other medias are available in a variety of roll widths and lengths.

Our depth of knowledge, extensive filter media inventory and manufacturing capabilities can deliver improved performance, improved productivity and less downtime for tough applications.

We have the technology and the experience to provide the right product for optimum filter life and improved performance. One-stop service means you get the right media processed to your specific application for a "lowest total cost" result.

Westco provides an extensive inventory with a complete range of woven and non-woven media available for quick shipment. Custom designs in any media can be produced to fit your required configuration. We operate a fully equipped lab to evaluate client's filtration needs and select the most cost-effective filter media for the job. The Converting (Roll Goods) Department is extremely diverse in the markets we serve.

We supply filter medias for metalworking, potable water waste water, absorbent casing and many other small niche markets. Our Converting equipment can trim from 1" to 143" roll widths and convert rolls up to 56" OD. Our "lowest total cost approach" drives our focus on each application. Our team is prepared to complete on-site filter surveys and field tests. We have the technology and the experience to provide the right product for optimum filter life and improved performance.

### **LET US BE YOUR USA BASED SOURCE FOR FILTER MEDIA**

We offer all types of materials for your gravity filter needs. Filter medias from .3 oz/yd to 8.0 oz/yd. We can supply filter media for almost every application. We can match materials for all types of machines and filters and have extensive experience matching materials from overseas.
