Filter Housing Gaskets - Parts

Westco offers a complete line of replacement o-rings and gaskets for most industrial bag and cartridge filter housings. Replacement gaskets can be sized based on the OEM model number. Materials include Buna, EPDM, Viton and Viton-Teflon encapsulated, Silicone and FDA materials.

MAXIMUM RECOMMENDED OPERATING TEMPERATURES

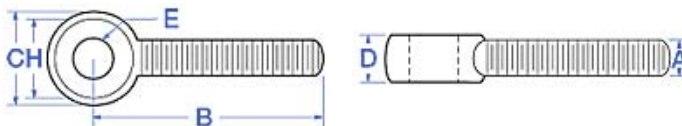

| GASKET MATERIALS | | |
|------------------|--------------------|-------|
| | BUNA N | 250°F |
| | ETHYLENE PROPYLENE | 350°F |
| | VITON | 450°F |
| | TEFLON | 500°F |

Information provided above is representative only and is based on observed data in a controlled setting. This information is not given as a warranty, specification of statement of fitness for use. Specific performance can vary widely depending on contaminant type, fluid properties, flow rates and other conditions. It is recommended that users conduct thorough qualification testing to assure the product functions as required for their specific application.

Westco offers replacement hardware for most industrial bag and cartridge filter housings, Eyebolts and Eyenuts as well as clevis pins and washers. Materials include: carbon steel, stainless steel and plated carbon steel.

When measuring the eyebolt replacement measure the length of the eyebolt from the center of the eye to the end of the threaded section (B) Measure the diameter of the bolt (A).

When measuring for the eyenut we need to the bolt diameter that it goes on. See above
